WARRANTY
+ 5 YEARS*

Here at the Sumec Group (a major division of Fortune Global 500 Sinomach Corporation) we took the opportunity in 2018 to re-brand our renewable energy business, from Phono Solar to Sumec Phono Solar Australia.

We wanted to highlight Sumec as our parent company to illustrate a major difference between Sumec Phono Solar and our competitors which is 'Confidence of Longevity'.

This is important because in 2011 there were more than 400 solar panel manufacturers approved for install in Australia. Today there are fewer than 100.

Sumec Phono Solar knows that we have a duty to our customers for the entirety of our solar panel's 25 year warranty.

Our financial strength means that we know we will be around to honour our warranties. This is our commitment to Australians and the Australian solar market.

40+ YEARS OF EXPERIENCE

WHY CHOOSE SUMEC PHONO SOLAR?

When you make the decision to go solar, you're making an investment that will save you money on power bills and make a positive environmental impact for decades to come. This means that there are some important questions you should ask yourself when weighing up your choice of solar panels.

Are these panels manufactured with cutting-edge technology that will last for decades?

Are they backed by stringent research, quality control and 3rd party testing?

Are they paired with a comprehensive warranty that you can trust?

Are they built to thrive in harsh Australian conditions?

Will this manufacturer be around in Australia for the long term to honour their commitments and warranties?

To help answer your questions and show why we're different, we've outlined **20 reasons to choose Sumec Phono Solar Panels** so you can feel confident in your investment.

1. Market Leading Technology & Testing

Sumec Phono Solar developed **Diamond Module Technology** and continues to innovate through our state-of-the-art Research and Development Testing Laboratory. This is one of only a handful of labs worldwide that are certified under TÜV SÜD's External Laboratory Program, which is assessed to meet the relevant requirements for Witnessed Manufacturer's Testing.

2. Ultra Modern Manufacturing Facility

The testing laboratory at Sumec Phono Solar's **NEW 2020 Manufacturing Facility** in Nanjing, features advanced equipment including Automated Production Lines, Laminating Machines, Stringers, Solar Simulators, and real-time Interaction Systems for complete quality control.

3. Rigorous Quality Control Testing

Up To **38 different environmental and quality control tests** are conducted each day including UV Pre-conditioning and Hot Spot Endurance testing.

4. Innovation for the Future

Diamond Module Technology is a multi-year R&D effort that has delivered multiple technologies focused on **absorbing more sunlight, reducing electrical losses** and **producing more power**. Learn more about our latest innovation by watching our video online.

5. Over 20% Module Efficiency

This generation of Sumec Phono Solar panels features the latest M6 cell technology combined with Round Ribbon Multi-Busbars to **deliver improved efficiency and higher power output**.

6. International Certifications - IEC TS 62941

This certification standard (IEC TS 62941) lays out best practices for product design, manufacturing processes, and selection and control of materials used in the manufacture of PV modules. It is over and above standard testing procedures required and includes Potential Induced Degradation, Salt Mist Corrosion Testing, Ammonia Corrosion Testing and Cyclonic Wind testing giving you full confidence that our solar panels are **manufactured for harsh Australian conditions**.

7. More Power, Means More Savings

Sumec Phono Solar uses the latest half cut cell technology, which **reduces electrical losses and heat production** in each cell. This in turn **increases performance in all weather conditions** while providing the long term reliability required to exceed production expectations and **deliver more savings** on electricity bills for decades to come.

8. Third Party Validation

Awarded EUPD Top PV Brand in Australia for the third year in a row meaning that Sumec Phono Solar is trusted by installers around Australia.

9. PV Module Reliability Scorecard

The annual PV Module Reliability Scorecard summarises the results of independent testing conducted as part of PVEL's Product Qualification Program (PQP) and identifies the solar panel models that achieved top performance. We are a **multi-year Top Performer in DNV GL's PV Module Reliability Scorecard**, meaning our panels have been found to offer outstanding reliability in independent testing.

10. Engineering Grade Warranty

Every Sumec Phono Solar customer enjoys an **Engineering Grade** 15 years product warranty. And for residential installations an **optional 5 years warranty** coverage* is now available for the first time to deliver an incredible **15+5 year product warranty***, which is **double** that offered by the most commonly sold panels in Australia.

**15 YEAR
PRODUCT
WARRANTY
+ 5 YEARS***

We are confident in this additional 5 years cover for Hot Spot and Seal Failure, due to the exceptional precision and quality control afforded by our new 2020 manufacturing facility.

20 REASONS TO GO SOLAR WITH SUMEC PHONO SOLAR

11. Corporate Social Responsibility

As a **responsible global, corporate citizen**, Sumec is committed to making a positive difference through a wide range of **social initiatives** across the world. Learn more about these initiatives in our **latest report**.

12. 40+ Years Experience

Because we were **founded over 40 years ago**, Sumec understands the power of longevity and we are serious in our warranty obligations by offering a **15+5 year product warranty***.

13. Warranty Confidence

Unlike Sumec Phono Solar, many well known solar panel manufacturers have been in business far less than the length of the warranty they offer customers.

Time In Business vs Warranty Length

14. Diversified Manufacturer

Sumec Phono Solar's parent group, Sinomach, is an international **highly diversified business** that manufactures cargo ships, agricultural equipment, textiles, electrical equipment and more.

15. Strength in Business by Design

Business diversification improves **financial resilience** and means we can invest in our renewable energy company, Sumec Phono Solar, regardless of specific market conditions in one industry. We design our products with **long term performance** in mind to be **confident in honouring our warranties for decades** to come.

16. Designed to Compliment Home and Business

Optimal design for your residential and commercial solar system is critical. Our Installer Network across Australia are provided with **product training and design support**. Well trained designers and installers will ensure your solar system not only perform to your specifications but also look great.

17. Australian Representation

Sumec Phono Solar's **Australian Head Office** is in Sydney and our products have been sold and supported in Australia for over a decade. Even before we started selling solar panels in Australia we were supplying power tools to customers via national hardware store chains.

18. Lasting the Distance

In 2011 there were more than 400 solar panel manufacturers approved for install in Australia, today there are **fewer than 100**.

19. Blue Chip Solar Manufacturer

Sumec Phono Solar is proud to be a **Blue Chip Solar Panel Manufacturer**. Blue Chip manufacturers are **low risk companies** that have been in **business over 30 years**, have **\$30+ billion in annual turnover**, have a diversified product portfolio and are capable of **servicing their customers locally**.
